

TRANSPLANT RATES

<1/5

chronic kidney patients
on transplant wait list¹

>2x

higher transplantation rate
for PD than IHD patients^{2,3}

PD IMPACT

BENEFITS

Reduced time to
wait-list placement⁴

Shorter time to
transplantation⁴

Lower incidence of
delayed graft function⁵⁻⁷

Lower trend for
acute rejection⁸

RISKS

Increased fluid overload⁹

Increased risk of
post-transplant diabetes¹⁰

INFORM PATIENTS

of the benefits and risks of PD as
applied to transplant outcomes
