

VOLUME OVERLOAD

57%

of PD patients experience volume overload that persists for 3 years after initiation¹

VOLUME CONTROL

FLUID MANAGEMENT

through PD prescription adherence using dietary and dialytic approaches¹⁻³

PHARMACOLOGY

using loop diuretics such as furosemide, which is significantly under-dosed in the U.S. (250mg vs. 1000 mag)⁴⁻⁶

ASSESSMENT

through newer techniques, such as bioimpedance spectroscopy, N-terminal pro-brain natriuretic peptide (NT-proBNP), and lung water ultrasound⁷⁻¹¹
